Warwickshire County Council budget 2026/27

Warwickshire County Council met on Tuesday 17 February to conclude their budget negotiations. Warwickshire County Council has approved its budget for 2026/27, alongside the medium-term financial strategy for the next five years.

The budget includes a 4.4% increase in Council Tax, including the 2% adult social care precept. This is lower than the maximum permitted increase of 4.99%, reflecting the Council's wish to support residents with cost-of-living pressures. The medium-term financial strategy also sets out a programme of efficiency savings and investments to maintain the Council's strong focus on prevention to help reduce future demand on services.

For a Band D property, the overall increase in the Council Tax bill will amount to an additional £1.56 per week. Find out more:

Warwickshire Food Strategy update

A further step to combat food poverty in the county, increase availability of affordable food in priority areas and empower communities to improve their diets and health outcomes has been taken. The plan will continue to focus on three strategic priorities.

- Affordability will focus on helping residents facing food insecurity to access more affordable, healthier food options through social supermarkets, community food projects, and other initiatives.
- A second priority area will use events like Kind Community, Kind Food and volunteer food champions to work with members of the community most in need to educate them, provide resources and develop their skills and confidence in choosing and preparing healthier food options.
- The third will promote locally sourced food and waste reduction by supporting suppliers in and around the county and influencing consumer behaviours. Discover more: <https://www.warwickshire.gov.uk/news/article/7484/important-steps-to-combat-food-poverty-as-warwickshire-prepares-its-new-plan>

Measles

Measles cases are rising in the West Midlands, and children under 10 years of age are most at risk. Over 99% of those who have two doses of the MMRV vaccine offer long-term protection against measles and rubella. Although mumps protection is slightly lower, cases in vaccinated people are much less severe. For more information, please visit
